ΠΡΟΓΝΩΣΤΙΚΟΝ

OR

An Astrological Prediction

Of the Various Changes likely to occurre in most Parts of *Europe* this present Year

1658.

From the Manifold Passions and Positions of the Cœlestial Movers, *viz.* the *Sun*, *Moon*, and *Planets*.

Together with a succinct Chronologie of The most Remarkable Accidents that have happened in this Island of *Great Britain*, since the Commencement of our late *Intestine Divisions*.

With the Rising and Setting of the Moon and many other necessary Rules and Observations, not commonly found in Works of this nature.

Respecting the Meridian of the famous University and City of *OXFORD*, Whose latitude is 51 *d.* 42 *m.*

By JOHN GADBURY Φιλομαθηματικός.

Cœlum instar libelli expansi est, notis Syderum omnia futura in se scripta continentis.

London Printed by *W. Godbid* for the Company of *Stationers*.

TO THE

Truly Ingenious and faithful Favourer of *Learning*,

WILLIAM BATTINE

of *Ringwood* in the County of *Southampton* ESQUIRE.

JOHN GADBURY, In Teſtimony of the Honour and Reſpects he bears (as ſtanding within the Orbs of Relation to) him.

Wiſheth all Happineſs and increaſe of Dayes, and humbly preſenteth theſe his ASTROLOGICAL Labours.

Every Month contains two Pages; a Right, and a left.

The left hand Page explained.

THis Page consists of six Columns. The first contains the Month days. The second the week dayes. The third, the fixed and moveable Feasts. The fourth, the *Moons* place in deg. and min. The fifth, the *Suns* place in deg. and min. The sixt holds the mutual Aspects, and change of Aire.

The Right-hand Page unfolded.

This Page consists of five Collumns. The first holds the dayes of the Month. The second, the *Moons* rising. The third, the *Moons* setting. The fourth, full Sea at *London-bridge*. The fifth, a Chronologie of the most remarkable passages perpetrated in *England*, since the year, 1640. with the precise dayes and years they happened on.

Some vulgar Notes explained.

Had I *Domingo's* skill, then would I go
To th' sky, and see what *Jove* and *Venus* do;
I'de search the Orbs to find the subtilty
Of *Pyrois*, who with them both comply:
I'de storm *Sols* mansion too, but that I see
None without *Ganza's* can to *Heaven* flee.

April hath xxx dayes.

Now slow-pac't *Chronus*, and his Counsellor
Call Theevish *Stilboon* to th' offenders Barre;
But he, being under *Mars* his Tutelage
Denies their Power, and disdains their Rage,
As who would not? what need those *Men* appeal
To *Law*, or *Chancery*, that bear *Mars* his Seal?

The *Stars* do but *incline*, cannot *compel*,
As all the *Learned Gymno Sophists* tell;
Which, if 't be true, the *bad* this *Month* portended,
May (by the *Prudent*) soon be countermanded:
For *Jove* and *Venus*, in *Conjunction* move;
To fill the *Land* with *peace*, Mens *Hearts*, with *love*.

Londoners Pet. for Tythes	1653
E. *Essex* defeated in the West	1644
Scots routed at *Worcest.* and the same day at *Dunbar*	1651 1650
Exceter taken	1644
French Fleet beaten *Dunkirk* taken	1652
Pamphlets prohibited	1655
Gen. *Pen* to *London*	1651
Basing-house relieved	1645
Souldiers ord. to trade freely	1654
Scots prisoners to *London*	1651
E. *Essex* deceased	1646
The Recognition ordered	1654
Isle of *Scilly* surrendered	1640
Treaty beg. at the Isle *Wight*	1648
The Mem. Parl. meet *West.* The Parli. appoint a Fast	1656
English Fleet from *Yarmouth*	1652
Newberry first fight	1643
Nickfield fight	1642
Scots colo. in *Westminster-h.*	1650
Routon-Heath fight	1645
The Parliament-fast	1656
Parlia. take the Covenant	1643
The Eng. Fleet return home	1652
Sir *John Gell* sentenced	1650
King came to *Shrewsbury*	1642
Barkley yeilded.	1645
D. *Featly* prisoner to *Peter-h.*	1645

October hath xxxi days

Here *Jove* and *Stilbone* by a *Quartile* greet,
While angry *Mars* doth with old *Kronos* meet
In *Libra*'s sign: Oh! most unpleasant story,
For † *Austria*, and *Livonia* lose their glory.
Nor wil't be good to *England*, for I see
Her *Signifer* in *detriment* to be.

† See my *Cœlestis Legatus* of this Conjunction, p. 62.

What part ☽ governs in man's body, being in any of the twelve Signs.

Twelve Signs do measure Heaven's Orbs most duly
Twelve Parts in man resemble those *twelve* truly

Head and Face.

Neck. Arms. Breast. Heart. Bowels. Reins. Secrets. Thighs. Knees. Legs.

Feet.

Thus *man* doth bear a part of every creature;
Be they, or mild, or monstrous mad (by Nature.)

Of the seven Planets and two Nodes.

♄ *Saturn.*	☉ *Sol.*	☽ *Luna.*
♃ *Jupiter.*	♀ *Venus.*	☊ *Dragons Head.*
♂ *Mars.*	☿ *Mercury.*	☋ *Dragons Tail.*

Who knows the wondrous workings of these *seven*,
Wants not an ace of knowing *God* and *Heaven*.

Of the five principal Aspects.

☌ *Conjunction.*	☍ *Opposition.*	△ *Trine.*
✶ *Sextile.*		□ *Quartile.*

The *Trine* and *Sextile*, are sure marks of *Love*:
The *others*, various *mischiefs* often move.

Cæli enarrant Dei fortis, & opus manuum indicat expansum eorum, Psal. 19. 1.

Englishmen land in *France*.	1
The prodigious change of *Mr. Macklayn* a *Scotch*-man viz. from 116 years of age to a young man again.	1
Spaniards ships fired by *G. Blake*.	1
Lord Protector Inaugurated.	1
Parliament adjourned.	1

To

To the Reader,

I Have in my *Books* for former *years* (as also in my *Cælestial Ambassadour*) not onely *Asserted*, but *Evinced* the *validity* and *Excellency* of the *Syderal Science*: which *Ptolomy* affirmeth to be the *only way* and *path* to the knowledge *of Gods* in the beginning of his *Almagest*.

In my *Speculum* for 1656. I proved the truth thereof from the woefull and dear purchased experience of many thousand of poor *English* souls, since the Commencement of our late Intestine Divisions: and shewed the *Concordancy* of the *Accidents* happening here on *earth*, with the various *configurations*, *passions*, *positions* of the *Stars* and *Planets* in *Heaven*.

And, in my *Book* of the last *year*, *viz.* 1657. I largely *predicted* the divers *kinds* of *Accidents*, that (according to *natural Causes*) were then *probable* to invade *most* of the *Nations* of *Europe*; which, how *true* they have *fallen* out, I had rather, *those* who have been *Actors* in the *dismal Tragedy* of *Europes woes* should *relate*, then my self *write*.

In my *Cælestial Ambassador* (published in 1656.) I have given an *Astrological Judgement* on the Grand *Catastrophes* and *Contingencies* likely to *occur* in most of the *European Countreys* for neer fifty *years* yet to *come*. And as my *Theam* was large, *viz.* the many *Conjunctions* of the *Planets*, in *September* 1656. my *observations* were the *more Copious*: yet for *satisfaction* to all, have I given *reasons* in *Art*, for those my *predictions* (a thing not very *frequent* among *Artists*) and for the ready *understanding* thereof (even by an *ordinary capacity*) I have digested my *Judgements* into *Annals*, highly *presuming* it will not only be *found* the more *pleasing* and *delectable*, but *profitable*.

Now, having taken this (not *ordinary*) *pains*, if any *Antagonist* shall seem *dissatisfied*, and question the *certainty* of this *Learning*; I shall refer him to the 40. and 41. *pages*

of that Book; where (if he be not *blinded* with *partiality* and *prejudice*) he may see, that the two last *years actions* of *France* and *Spain* have exactly corresponded with those my *Predictions*: And this, not in a *Diminutive*, but very *large sense*; then the *which*, what can be more *plain*, to evince the *credit* or certainty of an Art?

But, *notwithstanding* the manifold *verities* that are daily produced, not only by my *self*, but by many *others* herein; yet have we a *brood* of home bred *Antagonists*, and *Brutish Sycophants*, who most maliciously *scandalize*, both the *Art* and *professors* thereof; when *alas!* not *one* in *forty* of the poor *animals*, know, what Ἀστρολογία (i.e.) *Sermo de Astris*, or, the *Speech* of the *Stars*, means. They poor *ignorant Thraso's!* have a kind of *envy* against something, but they know not *what*; like the *Clown* in the *Comedy*, that was deeply in *Love*, but knew not with *whom*.

Impedit ira animum ne possit cernere verum.
By *wrath* so hindred is the *mind*,
That *Truth* it cannot see, or find.

I could *particularize* the *malice* and *madness* of some, who (it may be) would *blush* and *fume*, to have their *ignorance* divulged. But I will *pretermit* it here; and *mildly* tell the *squint-eyed Antagonist*, it is not *fair*, for any man (be he *never* so well *qualified* or *conceited*) to *stigmatize* an *Art* he is *unskilled* in; or, to reproach an *Artist*, unless he know certainly, his *practises notoriously sufficient* to prove him *guilty*. *Cæcus de coloribus ne judicet*. The *blind* can never *judge* truly of *colours*. Nor, can any *unskilled* in an *Art* be a competent *Judge* of an *Art*.

Most *true* it is, this *Art* is known unto but a *few*; but this is not an *argument* of the *evil*, but the *excellency* of it. *Non datur omnibus*, it is not given to *all men*, to be acquainted with Art. As *Seneca* said of Humane *matters* excellently. (*Non tam brevi cum rebus humanis agitur, ut meliora pluribus placeant*: *Argumenti pessima turba est*. It goes not so well with the *affairs* of men, that the *choicest* thing should please the *most*. The *multitude* is an *argument*

the worſt. So may I, of this *illuſtrious Learning!* Men have not ſo *glorious* a *Crown* beſtowed on them, that they ſhould *generally* be *bleſſed* with the *beſt* and choiceſt *Sciences*: The *multitude*, the *Rabble-Rout* of *Rural wretches*, (*Dull ſouls!*) muſt lie *groveling* in the *Rock* of *Folly*, *Envy*, and *Malice*, while the moſt *honourable* and *Glorious Arts*, in their *Meridian luſtre*, paſs by them *unſeen*. And it is an *oaken truth*, the *multitude* is an *Argument* of the *worſt*.

But, *cui fini*? To what end, trouble I my *ſelf* thus far? were I able to make this *Art* appear in its greateſt *ſplendor* and *glory*; and to unfold all the *Enigmatique wonders*, that are *wrapt* up in it, and to *pave* the way unto it, with Διαφανὲς, *Tranſparent* and *convictive verities*: that the paſſage to its *knowledge* were as *clear*, and *conſpicuous*, as the *Radiant Lamp* of *Heaven* in his *greateſt luſtre*: yet would there appear ſome *Beef-brained beaſts*, and *Bedlamers*, who would endeavor to *infatuate* the generality of the *world*, with their pretended *ſcurrile* exceptions. Albeit they are not *able* to render the hundred part of a *wiſe reaſon* for their *impudent* and arrogant *aſſertions*.

But, I will *ſtir* this *ſtinking puddle* no more at this *time*, referring the *ingenuous* to the tryal of thoſe *truths* which are daily, made *good* in *Generalibus Accidentibus Mundi*, or in Γενεθλιαλογία the *Genethliacal* part of Aſtrology, they being *ſufficient* to convince any *reaſonable* or *knowing* man.

For the *blundering* Ζοΐλος, or *Caſper*, I ſhall leave to *brag* his fond and frivilous *conceits* and *fancies*, as the *Ape* doth her *young ones* in the *Fable*; untill he be even *ſtormed* and *derided* by *God* and *Man*.

As there was a *Picus* that wrote againſt Aſtrology, ſo there was a *Bellantius*, that met with him; and to prove Aſtrology a real Art, (and that by his own *Nativity*) *predicted* his *death*, which came to paſs accordingly in the 33 year of his *age*.

And did not *Luther* finde a *Melancthon*? And *Chambers* a *Heydon*? ſurely yes! and I would aſk of *Aſtrologers* only

enemies, what Honour, *Gataker*, *Gaul*, *Homes*, *Rowland*, *Vicars*, &c. have gained by their *inveteracy* and *malice*? and whether the *names* and *memories* of those *men*, which once were accounted *venerable*, do not now *stink* in the very *nostrils* of all *sober* and *well minded Christians*?

Astrology (like *Christianity*) hath suffered many *fiery*, and *bloody persecutions*; yet, as the *Camomel*, or *Palm-tree*, the more it hath been *depressed*, or kept under, the *more* it hath *flourished*. And *God* hath raised up in all *ages* some *undaunted* and generous *Spirits*, to *vindicate* that *Science*, the *knowledge* of which cometh so *neer Himself*; which very *consideration* were sufficient (if *weighed* in the *balance* of *Reason*) to *convince* a *Legion* of *Antagonists* of the *validity* and *purity* thereof; and of its *miraculous* preservation by *Gods* most *blessed providence*?

First house on the right hand in *Strand lane*. *John Gadbury*.

Of Eclipses this year 1658. and what an Eclipse is?

AN *Eclipse* is a *privation*, or want of *Light*, in an *opacous* or *dark body*, which at sometimes is *affected* by a *Luminous* body; therefore of the *Greeks* is termed Ἔκλειψις ἀπὸ τοῦ ἐκλείπειν, *quod est deficere*, a *wanting*, *waining*, *falling* or *obscuring*.

And this (for our purpose) in the *opacous bodies* of the *earth* and *moon*; but more *improperly* (and yet more *commonly*) observed of the *Sun*. Whereas, it is impossible for a *luminous body*, (and such is the Sun) to suffer either a *privation* or *obscuration*.

For *light* is the very essence of the Sun, and no other body, whatsoever (I mean in *nature*) can be called, *Lux mundi* but he.

He

He is indeed, *Lux admirabilis*, a wonderfull *light*; and in a *wonderfull* manner, according to the *admirable wisdom* of an Al-wise God, is placed, in the *midst* of the other *Planetary Orbs*, that he may communicate *light* unto them the more *conveniently*; and all other *lights*, are but *dim* (if any at all) *compared* to him.

But, some may *object* and say, did not *God* create *two Great Lights*, Gen. 1. the one to *Rule* the *day*, the other the *night*? &c. and were not these *two great lights* the Sun and Moon? how then comes it to pass that the *Moon* is (as you say) *opacum corpus*, an *opacous* or dark body?

This, I confess, is the *common objection* that every *Objector* gets by the end; and if the *ignorant* can get but a little Scripture, which they think *favours* them, although they *understand* not the *meaning* thereof,) they deem *him* that *opposes* them, no less then Αἱρετικος, or Ἄθεος, an *Heretick* or *Atheist*, when it is *plain* they *themselvs*, are the *grossest Hereticks*, & the *greatest Atheists*, in that they so manifestly abuse the *Scripture*, which they understand not, and by *consequence* most *impudently* oppose the *glorious truth*.

Know sullen Ζοιλος, *Scripture* was not given,
For *you* to know, how many *Lamps* of *Heaven*,
Have proper *Light*; nor yet, to *teach* us *Arts*,
But it was *writ* to *rectifie* our *hearts*.

The *supreamest* TRVTHS in *Scripture* are wrapt up in *allegories*, *Metaphors*, *Metonymies*, *Synechdoches*, &c. so say the *greatest Clerks*, that ever yet *expounded* them. And the *text* mentioned in the *objection*, may be understood, either by a Συνεκδοχε *Synechdoche*, or Μετωνυμία, *Metonymie*, and both proper.

1. It may be understood by a *Synecdoche*, where the *singular* is put for the *plural*, as *Duo pro una*. God made two great *Lights* [for one *Great Light*] the Sun and the Moon [for the Sun only.] And this may appear *plainly* by other places of Scripture, where the *Holy Ghost* commonly uses this phrase or manner of *speech*. As in Gen. 21. 7. Who would have said that *Sarah* should have given *children suck*? where (by this *figure*) *children* is put for *childe*. For

Sarah gave suck to none but *Isaac*, as *Scripture* teacheth.

And again, in *Judges* 12.7. *Jephtha* was buried in the Cities of *Gilead*, where *Cities* is put for *City*, unless we shall incongruously conclude, that the *body* of *Jephtha* was *mangled* and *cut to pieces*, and buried in several *places*. But this were to *mangle* the sense of the *text*. Again, in *Mat.* 27.44. The *Theeves* which were *crucified* with him, *upbraided* him, *i.e.* one *Thief* only, for the other, *Cryed*, *Lord, remember me*, &c. So in this *text*, of *Gen.* 1. *God made two great Lights*, viz. the *Sun* and *Moon*: for the *Sun* only, for the *Moon* is but a *glass* to receive the *reflection* of the *Sun*, and of her *self*, hath no *light*.

Thus, the *plural* is put for the *singular*, and may very properly be so *taken*, without *infringing* the *truth* of the *Scripture*, or injuring the *intent* of the *Holy Ghost*.

2. It may be understood by a *Metonymie* where the *opacous* or dark *body* of the *Moon*, is put for the *light* she (sometime hath or) receiveth from the *Sun*. As the *cup* is frequently put for the wine, that sometimes is therein; or the *purse* for the *money*, that it often *contains*. But as the *cup* may be, and is often without *wine*, and the *purse* without *money*: so the *Moon* is often (*viz.* once a *moneth*) without *light*.

This manner of *speaking* is frequent in *Scripture* also: take *one place* for all, *Mark* 1.33. And the *whole City* was *gathered* together at the *door*: where it is *plain*, the *City* is put for the *Inhabitants* thereof.

And it is *common*, and a thing very *ordinary* both in *Scripture*, and other *writings* to finde the *subject* put for the *adjunct*, or that unto which a *thing belongs*, for the *thing* it self.

Besides, we see it apparently *true* in the *Moon*, every *month* *increaseth* and *decreaseth* in *light*; which *uncontradictably* *proves*, that she, like a *prudent Steward* renders up her *borrowed light* and *lustre* once a *month* unto the *Sun* her *Lord* and *Master*, and *leaves* it with him, untill he of his *bounty* grace her with it again: *ergo*, it is *clear*, the *Moon* is (*really*) no *great light*, nor of her *self*, any at all. And of this *opinion* is the *learned Anton.* See his Satyr of the ☽. Of

Of all the *Planets*, this appears most strange
In *apparitions*, and *inconstant* Change.
Sometime she like a *Sybe* her *face* doth show,
That *Barbs* the fields, when they *uncivil* grow:
Sometimes again thee's like a *rounded Ball*:
Her *crumpled Horns* appear most *Spherical*:
Which *Forms* the bright *Sun* (Heavens imperial Sire)
Prints in her *pale cheeks* with his *Golden Ear*.
Sometimes approaching with his *stately head*
But once a *Month*, *Lord*-like his *Ladies* bed.

And *Dubartas* that *Nightingale* of *France*, evinceth it more plainly: as Paraphrased by *Joshuah Sylvester*, fol. 37. thus.

I think thy *body* round as any *Ball*
Who *superfice* (nigh equal over all)
As a pure *Glass*, now *up*, and *down* anon,
Reflects the *bright beams* of thy *Spouse* the *Sun*.
For as a *Husbands* nobleness doth *lustre*
A *mean born wife*: so doth the *glorious* lustre
Of Radiant *Titan*, with his beams, *embright*
Thy gloomy *Front* that *SELFLY* hast no lights

From what hath been *said*, it *resul*ts that the *Moon* and *earth* being *opacous* or *dark bodies*, may suffer an *obscuration* or *depriva*tion of the *beams* of light, they sometimes have: but the *Sun* being a *luminous body* cannot.

That the *Sun* cannot suffer a *deprivation* or *want* of *Light*, I prove thus.

That *body* whose *essence* is *light* and *heat*: and whose *essential properties* are to *enlighten* and *enliven* the *world*, cannot be *deprived* of *light*. But the *Suns essence* is *light*, and *heat*, and his *essential properties* are to *enlighten* and *enliven* the *world*: Ergo.

The *Major* is *undoubted*. The *Minor*, I presume falls not very short of being so: and I *believe* there will hardly *any* be so *mad* of *mind* as to *cavil* at it. If the *world* should *afford* any such, I should *refer* the *intercourse* of *day* & *night*, and the *circulitionary courses* of the yearly *seasons*, to his or *their* consideration: and if that be not *sufficient* to evince the *truth* of the *Minor Proposition*, I dare *boldly affirm*, the adversaries reason hath taken *opium*.

Take a *familiar* instance, let a *Candle lighted* be set up in

a room, & it will give *light* round about: but if you hold your *hand* before the *light* of the *candle*, that *part* of the *room* will be *dark* which is *next* your *hand*, & yet the *candle* shall retain its full *light*. Now, there is no *man* in *reason*, can say the Candle loseth *light* by this *accident*, but rather the *room*.

Thus, and no other is it in *Eclipses* of the *Sun* When the *Moons dark body* cometh between the ☉ and our *sight* directly, then is the *sight* of the ☉ obscured from us: and the ☉ (as the *candle*) still keeps and *retains* its *splendor*, and it is we that are *eclipsed* and left in the *dark*: *Ergo*, the *earth* is *eclipsed* not the *Sun*.

But in the *Moons Eclipse*, there is a perfect *deprivation* of her *light* which is *obvious* to sence. For suppose the ☉ and ☽ to be in ☍, as they are *monethly*, and the ☉ to communicate his *light* unto *her* in the *fullest* manner: then suppose the *earth* to come *directly* between the ☉ and ☽, and you will *plainly* perceive, the *earth* (it being a *bigger body* then the *Moon*) to *deprive* the ☽ totally of the *Suns* beams. Therefore the ☽ may be *eclipsed*, and that very *proper*: and the ☽ coming (in the same *manner* between the ☉ and the earth will cause an *eclipse* of the *earth*: but this, not so great as that of the ☽: but, for to say the ☉ is *eclipsed* (unless by *it we stoop to vulgar apprehensions*) is against common sence, and manifestly *untrue*: And so I come to the *Eclipses* this year, and they will be *two*, viz. both of the *earth*; but neither of these *visible* at *Oxford*, or in any part of *England* See Cœlest. Legat. p. 75.

The first will be on May 21. at 14. h. 45. m. P.M. and will appear a *total obscuration* about the *Phillipine Islands*.

The second happens on Nov. 14. neer 1 : a clock at *night*, and may be seen, by *such people* as live in the *Islands de los Mongos*, &c. *where* it will be a very *great Eclipse*, and *terrible* to behold.

The *famous Mathematitian Argol*, mentions *two eclipses* of the ☽, besides these of the *earth*, one on *June* 5 the other on *Octob.* 30. but this *learned Artist* was mistaken, for it is *impossible* that any such *defect* can at either of these times be, if that of *Bullialdus* and *Santsbech* be true, that if the *middle place* of the ☽ be *distant* from either the *North* or *South* Node, at the time of the ☍ 15. d. 12. m. she cannot be then *eclipsed*. But the *middle place* of the ☽ is distant above 15. d. 12. m. in both these *plenilunians* from her *Nodes*: *ergo*, she cannot be eclipsed.

I speak not this to *detract* from the learned *Argol*, a man, unto whom *Artists* are much *beholding*, but to *shew*, that the *best* of *men* are but *men*, and so subject to *errour*. *Humanum est errare.*

Of the Spring.

THe Spring commenceth, when the ☉ enters the first point of ♈, which by *H.C.* according to the middle time is on *March* 9.d. 19.h. 13 m. P.M. as appears by the Calculation thence.

	Long. ☉.				Apogeon ☉.

But according to the Apparent time 19.h. 9.m. from which if I deduct 5.m. for the difference of the Intercepted Ark between *London* and *Oxford*, the *Sun* enters the vernal Equinox in the Meridian of *Oxford* at 19.h. 4.m *P. M.* or. 4 m. after 7. a clock the tenth day in the morning.

To finde the true Position of Heaven at the time of the *Suns* ingress, I do thus.

This

This done, I seek the degrees and minutes of the Ecliptique answering hereunto, under their respective elevations, which, (because I will not *blot paper* with their *operations*) you shall *finde* in the following *Figure*, thus,

2.66
Algenib
Algenib
Algenib

clination of the goods of *fortune*; a dislike of *Magistrates*, and *discontents* between them and their *Subjects*; many *riots* and vain *excesses*, breeding *unpleasing distempers* in the *bodies* of men; and as the ☉ is in □ of ♅, and he *Lord* of the 8th. *viz. Domo Mortis*, and both of them in Cadent *places* of the *figure*, and in *Cardinal Signs*, they may *many* of them (very probably) *terminate* in *death*.

And, as the ☉ and ♅ are *concerned* herein (although, it is true, ♄ and ☽ being in the 6th. threaten the *Plebeians* and the *vulgar people*, yet) *Great persons* are not free from these *calamities*, for they have *significations* of such. And as the ☉ is in the 12th. So will *Governours* have many *Enemies* rise up against *them*, and many *treacheries* will be set on *foot*, I fear an apparition of more *Sindercombs*. *Si quando* ☉ *fuerit in* 12. *habebit Rex ille anno anxietates & cogitationes magnos propter inimicos qui insurgent contra eum*. saith *Haly* de Jud. Astr. pars 8. If when the Sun shall be *posited* in the 12th. the *King* or *Governour* in that *year* shall have very great *griefs*, and many *perturbed thoughts*, by reason of the *evil enemies* that shall rise *against* him. What is said here of a *King* I would have my *Countreymen* of *Oxford* apply to *chief Magistrates*. Yet I would have them to know and *believe*, I *wish* them (*much*) better *fortune*, then this Aphorism of *Haly* speaks unto them.

I have heard some, well versed in *Astrology*, contend that we ought for to account a Planet Lord of a House, untill five *degrees* (at least) of the next sign were upon the *Cusp* thereof, which if it be true (as I have not yet experienced) then ♄ *Lord* of the 10th. is in ☌ with the *Governess* of the 8th. from the tenth in the sixth of this *Figure*, which *presages* according to *Haly*, that a Greater person, and more eminent *Governour*, then any in *Oxford*, will sustain much *grief* and *trouble*; Nay my *Author* says it is *pernicious* to the lives of those that are *Governours* in that *Climate* in which such a *Configuration* happens. *Haly* de Judic. Astrol. pars 8. cap. 19.

Jun

But hold my Muse! if thou the *nayle* should'st strike
On th' *Head*, thy judgement *many* would *dislike*;
Be thou *Low orbed*! and speak smoother things,
For *Flatteries* have tickled th' *ears* of *Kings*:
But 'tis a *sordid baseness*! Be then *bold*,
And speak the *truth*, as *Art*, doth it unfold.
" Pragmatique *Parasites* with *guilded* words
" Have done the *world* more mischief, then *sharp swords*.

About 12. years since, a *Learned Artist* of *Europe*, of this *year*, viz. 1658. writes. *Some great one deposed, he may be a King: or in danger of losing a Kingdom* And in another place, the same *Author* saith, *Sores ill healed, break out again to worse ends*: But I *transit* this *Subject*, referring the *ingenious* to my *Discourse of Prodigies* lately emitted into the *world*; where it is spoken of more *largely*; and hope that *Englands* enemies alone are aimed at.

♄ being *exalted* above the *Moon* in the *sixt*, imports many *evils* and *sicknesses* among men: much *knavery* in *servants*, and *Damnum in Bestiis*; and much *dammage* or *loss* in *Beasts* especially those of the *smaller sort*; for the *sixt house* is the house of *small beasts*. ♂ being also in the *Ascendant*, and in a humane sign, *viz.* in ♊, or the *Twins*, imports many *Bickerings*, *Quarrels*, and *Controversies* to happen among men; *generally*. *Haly* goes further, and says, *Si quando ♂ fuerit in Ascendente, significat multam effusione sanguinis in illo anno*. If when ♂ shall be in the *Ascendant* (he is so now) he signifies, there will be much *effusion* of *blood* in that *year*.

But it is ♀, that is *Lady* of the *year*, and she is *combust*, and *cadent* in the twelfth *house*, which of the *Greeks* is called Χακοδαίμων that is, *Malus Genius*, or the *House* of the *evil Spirit*, or *Angel*; but she is in ♓, her *exaltation*; yet her position under the *beams* of the ☉ in the 12th wil abate the *influence* that she *naturally* (and of her self) is *Author* of.

Quando ♀ fuerit Domina anni, & debilis, & mali afflata, signif. quod annus erit omnino mendicus, & abstinebunt homines ab hilaritatibus, & habebunt arctam vitam cum cogitamine & tristitiis & doloribus, accident populares morbi in mulieribus, & multa pregnantur morientur ex partu, & in multis

locis

loris cadent ædificia, &c. When ♀ shall be *Lady* of an *year*, and shall be *weak* and *ill dignified* (she is ill *dignified* now very much *accidentally*) that *year* shall be a very *poor* and *beggerly* year; and men shall be *inforced* to *abstain* from *much*: they shall undergo a *troublesom* and *hard life*, with many *griefs* and *dolours*: *popular diseases* shall be very rife in *women* (*Venus* is indeed their *proper Patron*) and *many* of them great with *child*, shall *die* in bringing forth: and in many *places*, *houses* and *buildings* shall fall *down* and be *destroyed*. *Vide* Haly, *de Judiciis Astrorum*, *pars* 8.

In this *Revolution* we have (indeed) four *Planets* in their *exaltations*, *viz.* ♄, ☉, ♃, ♀, but all of them are *Cadent*, and *Venus*, Lady of the *Horoscope*, *Combust*. So, that although (by their being *exalted*) they seem to *promise* much good; yet by their *severall ill Locations*, they will perform but little unto *mankinde*. But besides all this, we have *several* other *Configurations*, as the ☍ of ☉ and ♄, the 24. of *March*, and the ☌ of ♃ and ☿ the 1. of *May*, and a □ of ♄ and ☿ the 7th. of *May*, and a □ of ♃ and ♄ the 18th. of the same moneth, *&c.* Why should not something of *signal* concernment *begin* to shew it *self* to the *world* suddenly after the *Revolution*? the *Lords* of the *Figure* are in *moveable signs*, which shew *quickness* of *Action*. Nay there are several all other *Configurations* which are to be taken notice of, from whence the *accidents* of the *world* are to be *gathered*, according to that of *Ptolomy*. *Conjunctiones totius anni oppositionesque & quadraturas nec esse est ut consideres, per has cognoscuntur diversæ transmutationes temporum*, (i.e.) Consider the *several Conjunctions*, *Oppositions* and *Quadratures* of the *whole year*, for divers and sundry *transmutations* of the *times* are thence *caused*.

These *Configurations* (I say) I should have taken notice of, as also *Mars* his passing by the *Ascendent* of the late *Prodigie* in *Scotland*: and *Jupiter* transiting the *place*, where the *Comet* in 1652. appeared. *Cum multis aliis*. But I am *necessarily* confined to this *narrow* (*cramping*) of *Paper*, and will therefore *break off*, while things are *indifferent well*.

Should

Should I but venture th' other quarter sheet
The Countryman (*'tis made for*) *'twould not fit.*
Two pence *hee'l freely* give: *But ask him more,*
Uds' lid (*saith he*) chil en'e *ha none* avore:
Chave liv'd these vorty years, *and nere did gee*
A varthing *more*; *and now d' ye think that I*
Will raise the Vair! *I vaith chill leese my* eyes
Avore chil *pay* (*vor* Almanacks) Excise.
But now I think on't, 'is the Country *buyes*
My Books *all up*: *And he is surely* wise
That pleases him *he gets by*! *I will then*
Fit this my Book *toth'* Price *of* Country-men.
Thus Lawyers *use to please their* Clyents *great*:
For tis by them, *they get both* cloaths *and* meat.
The Learned Physicians, Vomit, Purge, *and* Blood
Their Patients, *but 'tis for their* own *good.*
Divines *do speak their* Auditory *fair,*
Because they wou'd have them return their Prayer.
The Marriner, *upon the* Seas *is bo'd,*
But 'tis in hope to Gain *some* Indian Gold.
The Merchant *takes a wondrous deal of pain,*
To please his Chapmen; *But it is for* Gain.
Thus Profit, *men* (*of all degrees*) *do make*
The only End, of what they undertake.
Why shall not I, 'cause by my Countrey Friend
I profit *Gain, please him, and make*
An END?

The Courteous Reader, is desired to take notice of a Sermon new published, entituled, *Astrology proved harmless, useful, pious*; wherein asserted the great necessity and utility of Astrology, from Scripture, Constitutions, Fathers, and Reason: yea, and from the Adversaries [illegible] Arguments. It is a Learned and judicious Piece, and worthy the perusal of all ingenious persons. Sold by *J. Barber*, at the *Lamb*, in [illegible] *Paul's* Church-yard.

The *Wisemans Crown*, being a new Method of Physick; with [illegible] [illegible], entituled, *The ready way to Bliss*, [illegible] ready for [illegible] [illegible] *Hungary Pyrenes*. All pieces of excellent Learning, worthy the perusal of all sorts: They were composed by *Eugenius Theodidactus*,
